

data_set_8

Base

- gembase.fa
- ordered_replicon.fa
- unordered.fa
- unordered_replicon.fa

Model

‘multi-loci’ flag has been set to TRUE for T9SS model and set to FALSE for T3SS and T4SS_typeI models.

Directory tree description

data_set_2

base	=> Contains Genome and Index.
test.fa.ori	=> This file was used to produce the output in the 'results' folder (during the run, test.fa.ori was named test.fa). This file is not used during test execution.
test.fa	=> Manually modified version of test.fa.ori file, created after the production of 'results' folder. This file is used during test execution.
models	=> Contains Models definition and Profiles.
results	=> Contains output produced by MacSyFinder when processing this dataset. Command line details: ./bin/macsyfinder \ --out-dir=tests/data/data_set_2/results \ --relative-path \ --sequence-db=tests/data/data_set_2/base/test.fa \ --db-type=gembase \ --models-dir=tests/data/data_set_2/models \ --models set_1 T9SS T3SS T4SS_typeI
